Subsequent to the listing, Goldman Sachs Group Inc. gradually reduced its interest in the company, control of which it had acquired in July 2005, by placing the remaining 54% of the shares with institutional and selected investors in several successive stages: i) 22% in November 2007, ii) 14% in November 2009, iii) 17% in March 2010. The ownership structure by geographical area confirms the predominant presence of US and UK investors, who at the end of 2013 accounted for around 50% of the capital held by institutional investors; they were followed by Italian institutional investors with 14% and by the French with 8%. Lastly, worth noting is the increase in the proportion of Asian investors since the prior year, particularly those from Singapore and Japan.

Approximately 73% of the share capital held by institutional investors is represented by investment funds with Value, Growth or GARP strategies, therefore focused on a medium to long-term time horizon. There has also been a steady increase in the proportion of shareholders adopting an Index investment strategy, based on the principal stock indices; in fact, this increase is consistent with the greater weight of the Prysman stock within such indices.
